

The Polish Society for the Study of Western Esotericism was founded in 2013 and affiliated with the Centre for Comparative Studies of Civilisations of the Jagiellonian University in Kraków. At present the Society gathers several dozens of members from different academic centres who, in their scientific achievements, have issues related to the study of Western esotericism. Our aim is to deepen the interdisciplinary research in this area by organising international conferences and open seminars, publishing, as well as conducting joint research projects bringing together representatives of the scientific and academic centres in this country and abroad. Our plans are to create an archive gathering all materials related to the scientific study of Western esotericism in Poland.

All partners whose academic interests are compatible with this topic are welcome to cooperate with our Society.
